Rack unit

€1200 + tax

This rack was developed in the 1920s. It comprises four shelves and is available in various designs. It seems to be fairly rare - we've certainly not seen many of them! Note that the photos merely shows an example in which the metal has been brushed and nickel-plated. Design variations are available on request - for example larger shelves. The shelves shown here are made out of beech wood and have been treated with hard oil. In our archive you will find a similar [rack](#).

Dimensions:
height: 200cm (78,7")
width: 70cm (27,6")
depth: 57cm (22,4")
