Large polished deep bowl reflectors

€350 + tax

These originally **vapour discharge lamps** were used relatively frequently to illuminate the interiors of large factory buildings. As they were built almost unchanged for nearly 40 years during the Eastern Germany era, we can almost always supply them in large quantities. We have retrofitted them to work with regular bulbs, polished the steel upper section and reconditioned the aluminium shade. The use of standard bulbs means they can be suspended at a lower height, including above bars and kitchen worktops. The quick-acting closures allow the glass to be easily folded out. Although the original ceramic socket is compatible with E40 light bulbs, an adapter for E27 bulbs is available, too. If required, these deep bowl reflectors can also be supplied without the glass.

Please note: You can order your own cord color and length! Please feel free to [contact us](#).

Dimensions:

height 54 cm (21.3") | diameter 46 cm (18.1")

Availability:

30+
