High-gloss polished 'bone-shaped lamp'  
with individual fluorescent tube

€695 + tax

An elegant, very simple design made in East Germany. The 'bone-shaped lamp' was frequently used in textile factories and light industrial workshops. Ideal for offices and lofts, it comprises an exposed fluorescent tube and two aluminium bodies connected by a rail. The standard low-energy fluorescent tube illuminates interiors evenly. By the way, we recommend using coloured tubes, for example in order to produce a warm yellow light.
