Tubular steel chair

€195 + tax

This tubular steel chair was manufactured in the East German era by VEB Stima in Stendal. In the 1920s, the same company designed furniture for the Bauhaus and made some of the first ever tubular steel furniture in the world. This loop seat probably dates back to the 1950s and was used in either a workshop or a school.

Dimensions:

Height: 46cm (18,1")

Seat: 40cm (15,7") | depth 38,5cm (15,2")
