High-gloss polished tubes for walls and ceilings | Long version

€950 + tax

These lights are our passion! Made in East Germany between the 1960s and 1980s (during which time they underwent only minor design alterations), they were built with the toughest conditions in mind. Dustproof, splash-proof and gas-proof, they were hence used throughout the chemical industry, in potash mining and at power stations. These lights are distinguished by their simple, straightforward design, which gives them the appearance of floating when fitted on a wall or ceiling. Amazing lighting effects can be created by using different colour gels. Both end pieces are made of aluminium and are connected together using three aluminium rods. This particular design is the lightest version featuring thin glass and four-point mounting and is suitable for living areas. Replacing the fluorescent tube is easy - just three nuts have to be removed in order to take out the internal lamp body. Prior to delivery, the lamp is completely dismantled, the aluminium parts are polished, and the electrics are improved using modern components. You can order these lamps also in a dimmable version. Please feel free to [contact us!](#)

Dimensions:

159 x 19.5 x 20 cm (62.6" x 8" x 8")

Weight: 10,7 kg
