Adjustable Midgard scissor lamp

€2300 + tax

The Midgard lights were designed by Curt Fisher in the 1920s to improve the illumination of the work places in his own factory. The Bauhaus master craftsmen soon perceived the ingenious design and superb quality of these work and desk lights and furnished not only the Bauhaus workshops with them, but also their private homes. The Midgard lights thus became an inspiration to Bauhaus designers and students such as Christian Dell or Marianne Brandt.

Design: Curt Fischer, ca. 1925

Producer: Industrierwerk Auma Ronneberger & Fischer, Germany
